- Dedicated and self-driven game designer, always seeking new knowledge and experience. Skilled at supporting teams, with a passion for creating and understanding gameplay systems across all areas of game development.
- Availability: Full-time employment starting in November 2026.

SKILLS & SOFTWARE

Game Design: Systems Design, Combat Design, Level Design & Blockouts, Gameplay Balancing, Playtesting & Feedback Analysis, Rapid Prototyping
Game Engines: Unity, Unreal Engine
Programming: C#, Blueprints
Production: Agile/Scrum, HacknPlan, Jira, Slack, Git, Perforce
UI/UX Tools: Figma, Framer, UXtweak
UX Research: User Research, User Interviews, Surveys, Usability Testing, Feedback Gathering, Competitive Analysis, Heuristic Evaluation
UI Design: Wireframing, Prototyping, Component Libraries, Accessibility, Responsive & Mobile Design
Art & 3D: Photoshop, Illustrator, Maya, Blender
Audio: Music Composition, Sound Design, FMOD, Reaper, Ableton
Productivity: Excel, Office, G Suite, Salesforce
Communication: Public Speaking, Documentation
Languages: Spanish (native), English (Advanced, C1)

GAME DESIGN EXPERIENCE

Contractor Game Designer | Dirk (Unreal Engine) *Dec 2025 – Mar 2026*
Independent video game studio based in Vancouver.

- Balanced combat and refined weapon feel and overall gameplay experience.
- Implemented gameplay features using Blueprint scripting.
- Blocked out campaign encounters and a base defense game mode, collaborating with the Art Director to ensure consistency and with artists on set dressing.

Level Designer & Project Manager | Atomic Overdrive (Unity) *Sep 2025 – Dec 2025*
Student project. 3D third-person online racing game.

- Developed a track-creation pipeline: from drawing 2D layouts to creating modular track pieces for rapid prototyping.
- Contributed to game design from pre-production to final release and maintained documentation through production.
- Refined multiplayer racing gameplay by conducting playtests and analyzing feedback.
- 3D-modeled assets, created VFX, collaborated with artists, and coded systems to bring the city to life.
- Integrated sound effects and music using FMOD, working closely with audio collaborators.
- Conducted meetings and defined weekly goals to keep the team aligned and on schedule.

Combat Designer & Programmer | SAPO (Unity) *May 2025 – Jun 2025*
Student project. 3D top-down bullet hell.

- Designed and implemented the core combat mechanics, including a poisonous tongue attack and a poison-stacking system that rewards close-range, aggressive play.
- Designed and balanced a 3-phase boss fight.
- Worked on VFX Graph, illumination, post-processing and UI implementation.
- Implemented audio with FMOD and composed, mixed and mastered the music in Ableton.

Solo Project | The Last Beat (Unity) *Nov 2024*
2D top-down rhythm survival game.

- Designed and implemented a rhythm-based combat system where dashing, shooting and reloading only work on the beat.
- Composed, mixed and mastered all the music in Ableton.
- Created a cohesive aesthetic with limited resources.
- Constantly balanced the game and gathered feedback.

- Designed the progression system: new enemies arrive every minute, upgrades help the player keep up, and the music speeds up the longer they survive.

PROFESSIONAL EXPERIENCE

Tour Guide | Discover Canada Tours *Aug 2026 – Present*

- Guided multi-day tours across Canada, some lasting 4 days, for groups of about 50 guests.
- Worked alongside other guides as part of a team to run each tour.

Bilingual Tour Guide | Toonie Tours *Apr 2026 – Oct 2026*

- Led walking tours of Vancouver for groups of 5–30 guests.
- Researched and presented stories about Vancouver's history, culture and landmarks through public speaking and engaging storytelling.
- Welcomed guests and provided a positive customer experience from start to finish.

Bilingual Customer Service Agent | Teleperformance *2020 – 2021*

- Used Jira, Slack and Excel to organize work and communicate with the team.
- Handled customer interactions in English and Spanish in a fast-paced environment.
- Strengthened communication and problem-solving skills by resolving customer issues.

EDUCATION

UI/UX Design Co-op Diploma *Jun 2026 – Present*
Cornerstone Community College | Vancouver, Canada
Focused on user experience.

Game Design Program *Jan 2025 – Dec 2025*
Vancouver Film School | Vancouver, Canada
Specialized in Level Design and Programming. Graduated with honors.

Bachelor of Digital Entertainment Design Engineering *2019 – 2026*
Pontifical Bolivarian University | Medellin, Colombia
Training across all areas of digital entertainment, focused on game development, supported by an engineering foundation. Developed VR, mobile and PC games in different roles.
